

# Zebulon Solutions

**An old-fashioned company providing modern productization solutions**

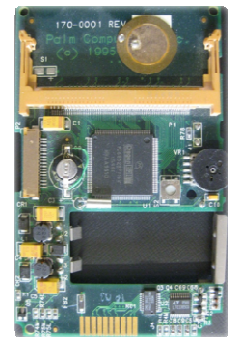

- ❖ Our **Mission** is to deliver solutions that save our clients money and time
- ❖ Our **Business** is productization—turning concepts into products
- ❖ Our **Culture** is old-fashioned: we're honest, we work hard and we keep costs down
- ❖ Our **Markets** are diverse, but we specialize in medical and clean-tech
- ❖ Our **Services** include:
  - Program management: end-to-end program / project management; PMO set-up
  - Product design: electrical; mechanical; software; system; DFMEA; GD&T
  - Industrialization: test development; DFx; supply chain; production set-up
  - Business analysis: ROI; cash flow; IRR; contracts

We're a start-up company, but our team has 100s of years of productization and business experience in medical, electronics, automotive, telecom, clean-tech, industrial and consumer markets.

Some notable achievements include:

- ❖ Productization of the original PalmPilot
- ❖ Developed and deployed over 500 test fixtures / systems for Xbox
- ❖ Concept and prototype design of the first Microsoft Tablet PC
- ❖ 50+ product launches including satellite radios, automotive products, analog integrated circuits, dryer consoles, base stations, robotic systems, telephones and medical equipment.

We specialize in **productization**—taking a concept or a technology or a R&D project and turning it into a production stable product. We may start from a napkin, a specification, a prototype or even a product in limited production, but we always end with a product that is fully industrialized, cost optimized and manufacturable.
